

COMPANY BUSINESS

ABOUT US

Hoard Medical Solutions-FZCO was founded in year 2019 with a vision to establish a reputed company to provide comprehensive solutions in Diagnostic Radiology, Radiation Oncology and other Healthcare related departments. The company has started his office in United Arab Emirates and is proud to be founded by pioneers in Radiological Physics and Engineering. **Hoard Medical Solutions-FZCO** provides diversified solutions to cater the need of hospitals, diagnostics centres and other healthcare providers.

Hoard Medical Solution-FZCO is an innovator in radiation oncology and the medical imaging service field because of the wide array of customer-driven solutions we offer.

SERVICES

1. Quality Assurance Services

Hoard Medical Solution-FZCO provide periodic/annual quality assurance services for Computed Tomography (CT) scanner, X-Ray machine, Bone Densitometer, Fluoroscopy machine, OPG/CBCT/Dental X-ray machine, Mammography, Cath Lab machine, C-Arm, O-Arm, Lithotripsy machine in diagnostic radiology and comprehensive quality assurance in radiation oncology (LINAC) and nuclear medicine department (NM Therapy, PET-CT, SPECT, Gamma Camera).

2. Consulting Services

Hoard Medical Solution-FZCO's radiological physics group provides high quality, cost effective services in diagnostic radiological physics, radiation oncology, nuclear medicine physics, health physics, and radiation safety. Company also provides professional trainings to cater need of radiation safety aspects in radiological departments with online training modules.

We can help you comply with FANR and DHA legislation & standards by full on-site radiation protection and quality assurance surveying. We do third party validation for Radiology and Radiation Oncology. We also provide services for commissioning of high end linear accelerator. We also provide services for remote treatment planning of radiotherapy patients. Our Radiological Physics Services consulting physicists are highly skilled professional and are certified and licensed by Dubai Health Authority, UAE (DHA) and Federal Authority for Nuclear Regulation, UAE (FANR).

Hoard Medical Solutions-FZCO provides consultation in:

- Radiation Oncology/ Radiotherapy for commissioning, acceptance testing, third party validation, quality assurance, shielding calculation, radiation safety standard evaluation, Quality audits for dosimetry, radiation safety and overall process, Remote Treatment planning services.
- Diagnostic Radiology: Shielding calculation, Evaluation for radiation safety and quality audit for radiation safety.
- MRI
- Nuclear Medicine
- Computed Tomography (CT)
- Mammography
- Ultrasound
- Shielding design of Equipment room
- On-site training
- RPO services and Trainings
- Regulatory consulting
- Acceptance testing

3. Sales Services

Radiotherapy: Hoard Medical Solution-FZCO provides complete range of mould room items and accessories, comprehensive quality assurance solution and dosimetry equipments. We customise cost effective and quality radiotherapy items as per customer need and radiotherapy goal. We manufacture Linac maze door, PET-CT room door and other lead lining door with high quality and radiation safety standards. All mould room accessories like AIO base plate, CT flat table Top, Hot bath tub, Thermoplastic cast, mould room alloy melter, SBRT mould room solution, Vac Lock, Gel and other Bolus, Eye & Gonad shield, Table Indexer, Customised mould room table as per Linac Table top, CT table top etc are few items of our catalogue and our range is more wider.

Hoard Medical Solution-FZCO also provide dosimetry and quality assurance solution as per Physicist need. We deliver cutting edge technology tools and equipment and train radiotherapy staff for smooth operation of a new or running department.

Radiology: Company also acts as Third Party Equipment Supplier & Service Provider in UAE as well as in other countries. We identified a market need for the high quality refurbished CT and MRI Scanner in different countries and provide them at affordable prices along with comprehensive maintenance solution. We also deals in Diagnostic Imaging Products like Computed Tomography scanner, MRI Scanners, Mammography, Bone Densitometer, Ultrasound, Color Doppler, OPG, X-ray and Computed Radiography.

The service offerings you can expect from us include; on-demand maintenance services, custom service agreements, equipment installation and de-installations, uptime guarantees, CT tube replacement service and more. In addition, we can offer technical and applications support, in-house or on-site service training, and a wide selection of quality replacement parts at much cheaper than OEM prices. We tailor our solutions to suit your needs.

In addition to the innovative service and parts solutions we also offer you an extensive selection of, carefully selected, previously owned MRI, CT and radiology systems. Whether you need a fixed or a mobile system, we can assist you from start to finish on your imaging project requirements including system purchase, site planning, relocation, installation and applications.

We are manufacturer for following items:

Radiotherapy: Linear accelerator room door and other items related to radiotherapy treatment and quality assurance. CT simulator flat table top compatible with Linac manufacturer table top having same indexing. We also manufacture Artifact free CT fiducial marker and scar markers.

Radiology: PET-CT room door, CT scanner room door, Refurbished radiology equipments and all parts related to maintenance.

Laboratory: Ultrapure water purifier

4. Projects management

Hoard Medical Solutions-FZCO also works as a managing partner with client to start a New clinics, New Diagnostic Departments and New Radiotherapy Department either as a partner with investment or as managing partner to establish and running the department independently. From A-Z, **Hoard Medical Solutions-FZCO** will be your project partner.

5. Personnel Monitoring and Calibration Services

Hoard Medical Solution-FZCO also provides personal monitoring services from recognised laboratories for periodic PMS with TLD. We have exclusive tie-up with PMS laboratory with international standards. We also provide you door step services for calibration of your equipments like radiation survey meter, pocket dosimeter, Dose calibrator etc.

PRODUCTS

EDUCATION & TRAININGS

1. Basic Radiation Safety Awareness Programme

This course is intended to train all radiation workers in Medical and Non Medical who directly or indirectly involved in radiation related procedures in healthcare and industrial radiography.

The objective of this basic radiation safety Course is to make all radiation workers participants familiar with basic radiation physics terms, radiation safety aspects and basic radiobiology. After successful completion of course participant would be able to understand different types of radiations, their hazard, evaluation and control. The content of the course is in accordance to FANR and IAEA regulations.

The lectures will be delivered by experts in Medical and Radiation Physics. Training will be online. An offline on-site training can be organized if number of participants exceeds ten in an organization.

2. Professionals Training

This course is intended to train all medical professional to latest technology in the field of radiotherapy and radiology.
